The MI Farm AI Brief #139

For Kent Harfmann, Mantorville Township, Dodge County, Minnesota

Sunday, July 19, 2026. Filed by The MI Farm AI Desk.

Weather

The NOAA National Weather Service forecast was unavailable this morning (source down at 5:00 AM after three tries), so today's high and low are not shown. We never print a guessed temperature. The rest of your Brief is unaffected.

Rain & Spray Window

No rain at your field in the past 24 hours. The spray window is open.

Rain expected at your field:

Next 24 hours: 0.00 inches expected Next 48 hours: 0.48 inches expected Next 72 hours: 0.53 inches expected

Source: NOAA National Weather Service forecast and NOAA radar rainfall estimates, pulled this morning.

Grain and Livestock, corn, soybeans, wheat, cattle

Live futures feed temporarily unavailable. Back in the next Brief.

Source: Chicago Board of Trade.

Decision Delivered

Your decisions for today and the week ahead:

- Paperwork: The fall ARC and PLC and Dairy Margin Coverage election window opens in late summer. That is in 13 days, so prep now, pull last year's yields and base acres so you can run the payment scenarios before you elect.
- Reminder, still on your list: Corn is filling grain (R3-R5 on seasonal normals) and beans are setting pods, the yield is being built now. Late-season disease and moisture stress matter most here.
- Reminder for this week: Hot, dry stretches raise spider-mite pressure on field edges. Scout the south and west borders of soybeans and corn.

Farm context: Harfmann Farm, 60 acres of hay, owner-operated since 1992 (real intake on file).

From Cal's News Desk

News desk feed temporarily unavailable. The news page and this desk read the same source, [mi-farm-ai/static/farm-brief/news_v2.json](#), refreshed through the day.

Cal's Receipt

Cal's Receipt is the running ledger of every call this desk made for your farm, what was at stake, whether you followed it, and what it actually saved (or cost). Append-only, and every dollar cites its source. You will find it on your farm Dashboard, on the Farm Services desk. Open the Dashboard from the button at the bottom of this Brief.

Today in Farm Safety

Stay out of a cow's blind spot directly behind her, and never turn your back on a bull. Most livestock-handling injuries are crushing and kicks in tight spaces. Move calmly, give yourself an exit, and respect a protective mother around

newborns. Source: National Ag Safety Database; University of Minnesota Extension.

Local Obituaries

No local obituaries for your area in today's papers.

The Coffee Shop

Today in Farm History, Second Morrill Act 1890

On August 30, 1890, the Second Morrill Act extended land-grant funding to historically Black colleges and universities. Seventeen 1890 institutions, Tuskegee, Alabama A&M, Tennessee State, and others, still operate under this funding line, and their extension and ag-research programs serve farmers today. Source: USDA National Institute of Food and Agriculture; 1890 Land-Grant Universities historical record.

Cal's Quiz

Within roughly ten years of his 1837 first plow, John Deere's Grand Detour shop was making about how many plows per year?

- (a) 100
- (b) 1,000
- (c) 10,000
- (d) 100,000

Answer at the bottom of the Brief.

Cal's Joke of the Day

The farmer noticed the first tassel of the year. He took a picture. He sent it to his grandson. The grandson sent back a thumbs up. The farmer told his wife, "That's twenty years of conversation in one emoji."

The MI Farm AI Desk

Cal "Corn-Bread" Halvorsen, your AI Agronomist and Editor in Chief

Quiz Answer

(b) 1,000 plows a year by the late 1840s. The self-scouring steel plow, polished from a broken saw blade, was the breakthrough tool for cutting sticky prairie sod. By 1855 his Moline works hit 10,000 a year. Source: Smithsonian National Museum of American History; Deere & Company archives.

Your data stays yours. We sell nothing you buy. Your farm data is never sold, shared, or used to train outside models. It lives on hardware we control, not the public cloud. Loyalty in writing.

The MI Farm Brief is the independent daily farm intelligence brief that earns zero when you buy inputs.
